**PREVALENCE OF MASS KILLINGS
1945-2013**

Source: Early Warning Project, <https://earlywarning.worlpress.com/>; Ulfelder, Jay and Valentino, Benjamin, "Assessing Risks of State-Sponsored Mass Killing" (Feb. 1, 2006). Available at SSRN: <https://ssrn.com/abstract=1033426> or <http://dx.doi.org/10.2339/arm-03-0626>

**HOMICIDE RATES IN THE US AND ENGLAND
1967-2013, AND THE WORLD, 2003-2012**

Sources: U.S. FBI Uniform Crime Reports, England (including Wales) U.K. Office for National Statistics, World U.N. Office on Drugs and Crime, reported in U.N. Economic and Social Council's World Crime Trends and Emerging Issues and Responses in the Field of Crime Prevention and Social Justice, Feb. 12, 2004, Figure 1. The percentages were converted to homicide rates by setting the 2012 rate at 6.2, the figure reported in the UNODC Global Study on Homicide 2013, Page 12.

**RATE OF BATTLE DEATHS IN ARMED CONFLICTS
1946-2013**

Source: Utopia Conflict Data Program Battle-Related Deaths v5-2014, 1999-2013, "Best Estimates" Missing estimates for 2013 for the Syria civil war calculated from a revised ICDIP "Low Estimate" and a "High Estimate" from the Peace Research Institute Oslo (both obtained in consultation with Erik Meisler of ICDIP, The "High Estimate" is for May 2013-April 2014, rather than calendar year 2013, and comes from Page 9 of H. Price, A. Gendau, & P. East, "Underestimated: Statistical Analysis of Documentation of Killings in the Syria Arab Republic," Human Rights Data Analysis Group, http://www.hrdag.org/Documents/Countries/SY/HRDAG_SyriaReportAug2014.pdf. World population figures from U.S. Census Bureau, http://www.census.gov/population/international/data/worldpop/stable_population.php

**VICTIMIZATION OF CHILDREN IN THE US
1990-2012**

Rates for physical and sexual abuse are per 100,000 children younger than 18. Rates for violent victimization at school are per 10,000 children age 5-12.

Sources: Physical and sexual abuse, National Child Abuse and Neglect Data System, analyzed by David Brothman, 2014, in "Trends in Child Welfare," Presentation at the Carney Institute Policy Series, March 30, 2014. Victimization at school, Bureau of Economic Analysis (top.gov), using the National Crime Victimization Survey, Victimization Analysis Tool.

**VICTIMIZATION OF CHILDREN IN THE US
1990-2012**

Rates for physical and sexual abuse are per 100,000 children younger than 18. Rates for violent victimization at school are per 10,000 children age 12-17.

Sources: Physical and sexual abuse, National Child Abuse and Neglect Data System, analyzed by David Brothman, 2014, in "Trends in Child Welfare," Presentation at the Carney Institute Policy Series, March 30, 2014. Victimization at school, Bureau of Economic Analysis (top.gov), using the National Crime Victimization Survey, Victimization Analysis Tool.

World population living in extreme poverty, 1820 to 2015

Data source: World Poverty in absolute numbers (Max Roser based on World Bank and Bourguignon and Morrisson (2002))

Literate and illiterate world population, 1800 to 2014

Our World
in Data

Data source: Literate World Population (Our World In Data based on OECD and UNESCO)

Number of world citizens living under different political regimes

The Polity IV score captures the type of political regime for each country on a range from -10 (full autocracy) to +10 (full democracy). Regimes that fall into the middle of this spectrum are called anocracies.

Data source: World Population by Political Regime they live in (by Our World In Data)

Global child mortality, 1800 to 2015

Share of the world population dying and surviving the first 5 years of life.

Data source: Global child mortality (since 1800) based on Gapminder and World Bank
