## Senior Back-End Engineer

Andrew Vlahutin

*Hands-on Data Scientist, Developer and Technology leader looking for a role to apply data skills to business problems*

New York, NY  
(347)-738-3149

### Career History

#### 2016 **Cornerstone Capital Management Holdings – Vice President Director of Technology**

December 2012 to September 2016 (3.8 years)

Strategic planning and delivery of all technology initiatives and related support for asset management firm with \$14 billion in assets under management. Provided strategic direction and oversight of team responsible for applications development, infrastructure, and end user support.

Designed and implemented a single strategic front office trading platform, Charles River IMS (CRIMS), to replace two disparate trade order management systems. Decoupled CRIMS and internal applications by adopting industry SOA and ETL best practices.

Redesigned and streamlined data feeds to increase efficiency of trading and settlement processes and eliminate redundant data reconciliation.

Skills: C#, .NET, IIS, Pentaho, MS Sql Server, SQL

#### 2012 **J.P. Morgan Asset Management – Vice President Business Analyst and System Architect**

January 2008 to December 2012 (4.9 years)

U.S. based Accounting System replacement: Designed trade interface and data migration strategy between Eagle and front office trading systems, ensuring seamless transition to new accounting system. Global U.K. based Accounting System replacement:

Redesigned data flow between multiple trading systems, new positional data store and service provider, resulting in greater accuracy and transparency of trade flow details. Identified and resolved timing dependencies around global data across systems in the U.S., U.K. and Asia.

Data Services Architecture: Architected and built system wide SOA layer, including multiple data services and a core Enterprise Service Bus. Facilitated adoption of Big Data solutions using Splunk log integration. Championed use of development methodologies around TDD, Agile development and efficient QA testing efforts.

Skills: Java, Spring, Mulesoft, Websphere, Agile (Scrum), Sybase, IBM DB2, SQL
